

Dynasty *Global Consulting*

We help businesses and investors structure opportunities from concept to execution in Namibia.

COMPANY PROFILE

About *Dynasty*

Dynasty Global Consulting works with businesses, investors and organisations to develop commercially viable strategies, structure projects and coordinate implementation. Based in Windhoek, Namibia, the firm combines commercial advisory with practical project oversight, drawing on sector specialists and local professional partners according to the requirements of each engagement.

Our work spans business establishment, expansion planning, project development, operational improvement and investment preparation. We engage from initial assessment through to implementation, with defined responsibilities, clear reporting and attention to commercial feasibility.

DYNASTY
GLOBAL TRADING ENTERPRISE
Advancing African Trade & Enterprise

ADVISORY

Our advisory *approach*

Strategic Direction

Establish the commercial objective, assess the operating context and identify the decisions required to advance an opportunity.

Commercial Structure

Translate objectives into viable business models, project scopes, budgets, implementation plans and governance arrangements.

Local Intelligence

Apply market understanding, regulatory context and relevant stakeholder relationships to practical decisions.

Coordinated Delivery

Align specialists, contractors and stakeholders through implementation, with central oversight and accountability.

ADVISORY SERVICES

Services

Strategy & *Commercial Development*

Business and growth strategies; commercial and feasibility assessments; market research; operating models; business plans; and investor documentation.

Project Structuring *& Design*

Project concepts, scope definition, implementation frameworks, budget and financial-modelling support, procurement planning, regulatory documentation and delivery roadmaps.

Project *Management*

Lifecycle planning, execution oversight, project governance, reporting, procurement coordination and management of contractors and stakeholders.

Services, *continued*

Market Entry & *Local Establishment*

Market entry strategy, company establishment coordination, regulatory and statutory documentation, banking facilitation, partner and supplier identification, and operational set-up.

Specialist legal, tax and regulatory matters are coordinated with qualified local professionals.

Industrial & *Sector Development*

Industrial project concepts, investment readiness, processing and value-addition planning, operational frameworks, feasibility support and implementation coordination.

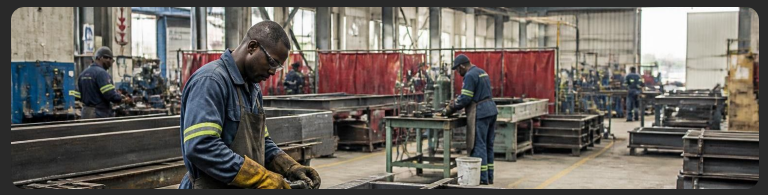
Investment & *Commercial Development*

Business cases, investment memoranda, funding proposals, investor presentations and commercial documentation for project evaluation and capital discussions.

Sector *coverage*

Mining & Resources

Commercial development, market entry, project structuring and coordination across resource-related initiatives.

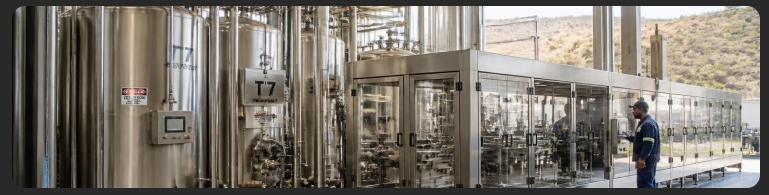


Industrial & Manufacturing

Operational planning, manufacturing development, productivity improvement and industrial project support.

Construction & Infrastructure

Project preparation, stakeholder coordination, procurement planning and implementation oversight.

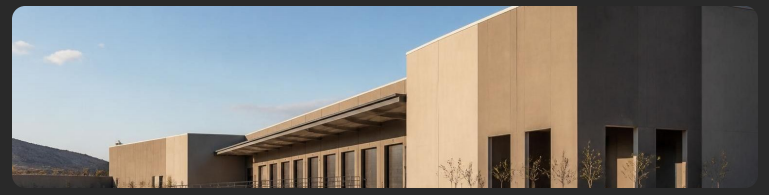


Processing & Value Addition

Planning and development support for processing facilities and higher-value industrial production.

Agriculture & Agroprocessing

Agribusiness development, food processing, agricultural investment and supply-chain initiatives.



Commercial & Industrial Project Development

Commercial structuring and coordinated delivery of property, facilities and industrial ventures.

Who we *work with*

Investors & International Businesses

Businesses evaluating opportunities, entering Namibia and establishing a local operating presence.

Companies & Growing Enterprises

Enterprises developing projects, improving operations, preparing for investment or entering new markets.

Institutions & Delivery Partners

Organisations requiring coordinated specialist input, stakeholder management and defined implementation arrangements.

FROM ASSESSMENT TO IMPLEMENTATION

Methodology

Understand

Confirm objectives, constraints, market conditions, stakeholders and the commercial basis for the proposed work.

Structure

Define the operating or investment model, workstreams, responsibilities, budgets and delivery pathway.

Mobilise

Identify and coordinate the specialists, suppliers, advisers and project participants required.

Deliver

Oversee execution against agreed scope, reporting requirements, governance and milestones.

Strengthen

Support handover, operational readiness and continuity where required.

A collaborative *delivery model*

Dynasty uses a collaborative delivery model. Specialist technical, legal, financial and sector expertise is brought into assignments as needed, while project coordination and client accountability remain clearly defined.

WORKING WITH DYNASTY

Why *Dynasty*

01

Commercial focus

Assignments begin with the underlying business case and the decisions needed to establish feasibility and direction.

02

Direct senior involvement

Clients work with a clearly identified lead consultant, supported by relevant specialists.

03

Integrated advisory and implementation

Strategy, documentation, stakeholder coordination and execution planning are treated as connected workstreams.

04

Local coordination

Namibian market understanding and relationships with appropriate local advisers and delivery partners support establishment and implementation.
